

eSAP - Generating value for business through sustainability

The Electrical and Electronic Equipment Sustainability Action Plan (eSAP) is the collaborative framework for sharing evidence and implementing sector-wide actions to improve business efficiency and the sustainability of electrical and electronic products.

"We commit to playing our part in working with WRAP to develop and implement eSAP"

We will work with WRAP developing sector actions in the following areas: *[please tick all the areas that apply]*

- Extending product durability
- Minimising product returns
- Understanding and influencing consumer behaviour on product durability and reparability
- Implementing profitable, resilient and resource efficient business models
- Gaining greater value from re-use and recycling

We will provide our logo for WRAP to use in connection with any collateral and promotional material for eSAP.
